WORK EXPERIENCE

Tableau Consultant for ad-hoc projects for 15+ clients

UK, US, Europe

I specialise in providing beginning to end BI solutions, through support/training services for clients. Guiding them through their data, supporting their own development via calls and on-site training sessions. This encompasses Tableau best practices, design, efficiency, and streamlining for performance, marrying visual analytics with pre-requisite data manipulation and prep for ease of work and speed to insight.

Tableau Consultant

Chewy – US

Nov 2022 – Aug 2024

- Designed, created and maintained an automated and centralised Tableau repository with cross-functional data for more informed and faster business decisions
- Consulted the team on ETL processes to ensure data accuracy and better performance
- Focused on improving the User Experience when interacting with the data along with maintaining visually compelling dashboards.

Tableau / Power BI & Data Strategy Consultant

Field Pros Direct – US

Oct 2021 – Aug 2024

- Migration between the two platforms. Recreated all Tableau dashboards to Power BI, including complex data connections
- Dashboard building and remote support, developing multiple projects at various levels of the business to track insurance related metrics such as claim volume, geographical analysis, and other financial KPIs
- Tableau Online content and data source management
- Database migration to AWS technologies (S3 & Athena)

Tableau Consultant

Picker – UK

Aug 2021 – Oct 2021

- Enhanced Tableau dashboards both in terms of design and functionality
- Supported the team by updating the datasources every year and adjusting the affected dashboards
- Provided remote Tableau training and guidance on performing changes when needed

Tableau Consultant

University College London – UK

Mar 2021 - Aug 2021

- Designed and built Tableau dashboards to derive insights from UCAS student applications and HESA data
- Utilised Tableau Prep to manage, clean, and transform the data to the right structure and format for analysis

Tableau Dashboard Designer

Cognita AG – Germany
Nov 2020 – Feb 2021

- Dashboard building, training services, and remote support
- Upgraded existing reports to adopt best practices, exploit newly available techniques, and future proof

Tableau Consultant

Intouch Group – US
Apr 2020 – Aug 2023

- Designed and created centralised Tableau dashboards to track and analyse important KPI metrics for various business areas and help improve decision making
- Introduce a navigation side bar that allowed the stakeholders to switch between dashboards in a fast and efficient way
