---

## Personal skills

---

I know how systems work, and know how to help them evolve and succeed. I can build a system from scratch - or learn, develop and optimize an existing one. I learned my way from a junior web-dev to a CTO and am familiar with any of the steps.

Passionate, love challenges.

A team player as well as lone warrior. Experienced with managing a team.

Can be a team-leader, an architect - or just fulfill the tasks and write code.

Know to write specifications prior to development or build documentation of an existing system.

A quick learner.

---

## Technical stack

---

I am proficient in a wide range of technologies, including but not limited to:

- Backend: **PHP (Yii2, Laravel)**, **Nodejs** (vanilla or **NestJS**), Python
- Frontend - Web: Vanilla / **React** / **VueJS**
- Mobile apps: **React Native**, **VueJs + Quasar**, **Flutter**
- Databases: **MySQL** on a full-DBA level; other SQL dialects, noSQL
- Cloud Platforms: **AWS**, **Cloud Foundry**
- integration with any kind of **API**
  
- Linux user for over a decade
- Git
- Youtrack / Jira / Trello / Asana
- Shell scripting to make life easier
- Mobile application lifecycle: submitting to stores, etc
- Experienced also with older versions of PHP

- SAP ecosystem
- AI: mainly Cursor and Claude Code

---

## Experience

---

### **Orijinn • Founder / CTO / Developer**

November 2009 - Present

My company provides development, QA/QC and project management services. Working with various types of clients, small (private) and big (Bezeq Int, Dor-Alon, Lapidot, MGroup, etc) on various types of projects (from one page landing pages to complex CRM - user-end systems developing throughout the years. Some of the more interesting projects listed below; there were many more - please ask me if interested.

### **NextSilicon • Full-stack Web-developer**

January 2025 - Present

Building tools together with other developers, helping with DBA.

### **Adytech • Software Architecture, Web development**

July 2024 - Present

Building web-interfaces for company products.

### **Coldfish • System architecture, Web development**

December 2023 - present

Helping to scale and rewrite an existing system.

### **Nuvola • System architect**

August 2024 - December 2024

Helping to scale and rewrite an existing system.

### **Eyevation • Web dev**

March 2024 - February 2025

Responsible for a web part of a system working with VR.

### **Haifa University • ReactJs, AngularJS, NodeJs, Java**

Jan 2024 - Aug 2024

Maintaining apps on various technology stacks, working with SAP ecosystem, consulting on various software-related topics.

### **Israeli Medical Association • Software Architecture, ReactNative, ReactJs, NodeJS**

Dec 2023 - May 2025

Developing apps on ReactNative, consulting on software solutions.

### **Eyeviation/Brainspace • Python dev**

Nov 2023

Helped with a small part of the companies' activity, helped to build a Python project on a specific system.

### **QuantumVision • SAP dev**

Oct 2023 - September 2024

Developing apps on various technology stacks, working with SAP ecosystem / CloudFoundry services.

### **Xtras Staffing Solutions • CTO / Team lead / Senior Developer**

Jan 2022 - Oct 2023

Developed and optimized a live system, while learning it. Created documentation. Set up a testing and CI/CD flow.

### **Ctconnect / System Architect / DBA / Senior Dev / Team leader**

Nov 2010 - Jan 2023

Started this project as a relatively small road-accident reporting tool, and took it through all the journey to a huge system serving municipalities and their citizens to a mutual satisfaction. CRM for the management, from tickets selling and second hand sellings to statistics and reports, Mobile applications, Wordpress sites for the local authorities, connections to payment, IDF and IoT APIs - all in one neat ecosystem successfully providing a 24\7 service.

### **Mappo.me • CTO / Senior Developer**

Mar 2018 - Jul 2020

Helping a visionary to bring his dream alive is highly inspiring.

A project that started as a small side-job with a map, led to a full-scale collaboration to build a tourist map for Israelis and visitors alike. Built with the help of Israel Innovation Authority.

### **FromTali Delivery • CTO / System Architect / Senior Developer**

Jun 2010 - Jul 2019

Local production store that turned into an internet grocery market with a delivery - a journey from

Excel file sent to customers, to a full-scale e-shop. A system developed from scratch to meet the exact needs, containing of catalog auto-update, payable orders, users management, statistics, delivery application and more.

**HumanEyes Technologies • Web Developer**

Mar 2008 - Jan 2012

**Cluster Logic Ltd • Web Developer**

Jun 2011 - Aug 2011

---

## Education

---

**The Hebrew University of Jerusalem**

2005 - 2008

B.Sc in Computer science and Mathematics

---

## Languages

---

English - fluent

Hebrew - native level

Russian - native

Greek - A1

---

## More about me

---

My specialties include:

- “connect this to that in a most optimal way”
- “nothing works and no one has any idea why”
- “a previous developer left us with some strange stuff”
- “it's bad and we don't know how to make it good”
- “we have a great idea but cannot imagine how to start with it”

I always treat any project, small or huge, as my own.

My main problem is a lack of ability to make bad things. I will always look to find the best way, considering all the requirements (including marketing and time-wise ones) - but I'm that bag gal that won't let you release a Production version before the weekend, unless otherwise we'll all die.

Since 2011, I've always had a big project to take care of, so I'm unfamiliar with a feeling of empty hands. Would be glad to find a project to contribute to.

Registered European business.

Recommendations available upon request.
