PROFILE

Dedicated and professional manual tester with more than 20 full years of experience working in software testing and general software development. Excellent analysis, evaluation and perception abilities, as well as a strong attention to small details for accurately identifying all problems and bugs quickly and effectively. Experience in working with different SDLC Methodologies.

WORK EXPERIENCE

Software Quality Assurance

MindGeek | 10/22 – **09/23**

Part of a team of testers responsible for testing and establish the quality of the product. I am responsible to thoroughly test tickets assigned to me by my lead in multiple environments and all through the release of the ticket.

- Tickets are tested in multiple environments all through release.
- Daily exploratory testing
- Carry through assigned daily smoke tests of the product.
- Close collaboration with the team to share information.

Quality Assurance Officer/Tester

Protoio Inc | 7/15 – 7/22

Summary of your role in the position. Detail your role, responsibilities and, importantly, highlight your achievements. List your roles chronologically, starting with the most recent first. Use bullet points to summarise your accomplishments and key experience you want to highlight

- Tested both Proto.io and Overflow.io Products
- Review and analyse Jira stories requirements, specifications, and acceptance criteria.
- Run Tests on multiple environments including windows, mac, mobile, safari, chrome and Firefox.
- Updated Jira stories
- Bulleted job description
- Participate in meetings.

WORK EXPERIENCE CONTINUED

Quality Assurance Officer/Tester

Hyperion System Engineering Public LTD| 05/11 – 11/12

- Run the installations of the software.
- Helped develop and maintain the knowledge web page of the company.
- Identified problems with the installations.
- Developed software manual.

Quality Assurance Officer

Netquest Cyperopsis Webdata Ltd | 01/06 – 12/10

I was the sole tester of the company. I was responsible to test all tickets of the product of the company. From the local environment to the live. I tested in black box testing and contributed to the quality assurance processes and procedures.

- Executed tests to verify new features.
- Executed tests to verify fixed defects.
- Maintained the defect reporting workflow tool.
- Reported defects and recommendations in defect reporting workflow tool.
- Applied black box testing techniques utilizing user interface.
- Tested UI and Reports
- Reviewed specification prior commencing testing activities
- Obtained relevant information impacting testing activities.
- Contributed to quality assurance process and procedures.

Quality Assurance Engineer

Edams Technology | 02/01 – 12/05

I was testing the products of the company regarding water, sewage and electricity facilities. Started testing the CRM software and then moved to test the more technical products of the company.

- Worked on a technical system for water & sewer utilities.
- Executed Parallel test cycles prior code freeze verifying new enhancements to product.
- Executed pre-release test cycles on complete product prior production release.
- Maintained quality assurance records using MS Excel
- Reported defects and recommendations in defect reporting workflow tool.
