PROFILE

Seasoned, highly skilled and forward-looking Software Engineer with background in creating and executing innovative software solutions to enhance productivity. Committed to delivering innovative and efficient solutions that drive company success

PROFESSIONAL EXPERIENCE

April 2019 –
September 2019
Lagos state, Nigeria

CASTLEY GROUP OF COMPANIES, Software Engineer (INTERN) [📄](#)

During my internship at Castley Group, I gained valuable experience in software development and project management. My key responsibilities included:

- Assisting in the design, development, and testing of web applications using HTML, CSS, and JavaScript.
- Working closely with senior engineers to identify and resolve performance issues in existing applications.
- Conducting unit and integration testing to ensure the quality and stability of applications.
- Supporting the deployment of software updates and patches across various systems.
- Collaborating with cross-functional teams to gather requirements and provide technical solutions.
- Gaining exposure to version control systems like Git and participating in code reviews.

January 2021 –
June 2021
Lagos, Nigeria

Bfree Africa, Software Engineer

During my software engineering internship at Bfree, I had the opportunity to work in a collaborative and dynamic team environment where I contributed to various aspects of software development and data analysis. My key responsibilities included:

- Collaborating with senior developers and cross-functional teams to design, develop, and maintain software applications.
- Writing and testing code in various programming languages (e.g., Java, Python) to implement new features and enhancements.
- Identifying and resolving software bugs and performance issues through troubleshooting and debugging.
- Conducting data analysis to provide insights into customer behaviors, helping to optimize product features and user experience.
- Extracting, cleaning, and analyzing large datasets using Python and SQL to identify trends and make data-driven recommendations to improve business processes.

January 2023 –
November 2023
Lagos, Nigeria

Sehder, DevOps Engineer

As a DevOps Engineer at Sehder, I was responsible for implementing and optimizing the CI/CD pipelines and managing the infrastructure that powered our health sector-focused platform. Key achievements and responsibilities included:

- Collaborating with development teams to streamline the build, deployment, and release processes, improving efficiency by 30%.
- Setting up and maintaining infrastructure using cloud services like AWS and Docker for containerization.
- Automating configuration management using tools such as Ansible and Terraform, ensuring consistency and scalability across environments.
- Monitoring system performance and ensuring high availability using tools like Prometheus and Grafana.
- Managing version control using GitLab, coordinating code releases, and ensuring smooth integration and deployment across multiple services.

January 2024 –
September 2024
Lagos, Nigeria

Cowris Tech, Frontend Engineer 

At Cowris Tech, I lead a team of engineers in the development of various projects including the website, mobile app, and CRM system. I personally handle the website development, which can be accessed through the link provided in my bio. The website was created using next.js, TypeScript, and Tailwind CSS, and is hosted on Vercel. One of the main features of Cowris is the ability to exchange CAD to Naira and other currencies seamlessly.

EDUCATION

February 2023 –
June 2023
Lagos, Nigeria

SGL Technologies, Software Engineering

August 2018 –
July 2022
Ogun State, Nigeria

Babcock University, BSc Computer Science
Second Class upper in computer science

September 2012 –
July 2018
Lagos State, Nigeria

CMS Grammar school, SSCE (Secondary School Certificate Examination)

SKILLS

Programming Languages: Java, Python, JavaScript, HTML and CSS •

Frontend Frameworks: React, Next js and Vue js • Version Control: Git, GitHub, GitLab •

Test Driven Development • SQL, Database , Data science

PROJECTS

January 2024 –
January 2024

Portfolio [↗](#)

A website build with React, tailwind and framer motion the link is provided

April 2024 – July 2024

COWRIS [↗](#)

COWRIS is a website built with Vue.js and Tailwind CSS, designed for converting and sending various currencies such as NGN to CAD, CAD to NGN, NGN to USD, and more.

January 2024 –
March 2024

SEHDER [↗](#)

SEHDER is similar to LinkedIn but tailored for the health sector, built using Next.js and Tailwind CSS.

September 2023 –
September 2023

Cotorie [↗](#)

Cotorie Homepage built with HTML,CSS AND JAVASCRIPT
